

Libido Pro Male

A Botanical Boost*

Libido Pro Male is a unique blend of botanicals formulated to support a healthy libido in men.* The formula contains herbs with a long tradition of use, many of which are known as natural aphrodisiacs:* *Epimedium sagittatum* (horny goat weed), *Tribulus terrestris* (puncture vine), *Withania somnifera* (Ashwagandha), *Fouquieria splendens* (ocotillo bark), *Cinnamomum zeylanicum* ("true" cinnamon) and *Corynanthe yohimbe* (yohimbe).

#78200
59.15 mL (2 fl. oz.)

Key Features

- Unique blend of herbal ingredients formulated to provide synergistic support for male libido.*
- Promotes healthy blood flow to the sexual organs and relieves pelvic congestion.*
- Supports endogenous synthesis of nitric oxide associated with healthy erections.*
- May help alleviate the effects of stress on sexual desire, performance, and pleasure.*
- Tested to be free of pharmaceutical phosphodiesterase-5 (PDE5) inhibitor residues.

Epimedium sagittatum (horny goat weed) has been used in traditional Chinese medicine to enhance libido and sexual function by improving blood flow to the genitals and other tissues.* One of the main active compounds in horny goat weed, icariin, has been shown to inhibit phosphodiesterase-5 (PDE5) while increasing nitric oxide production associated with healthy erections.* Tissue studies have shown that icariin can actually stimulate the growth of pelvic nerves which may also improve sexual function.*

Tribulus terrestris (puncture vine, also known as tribulus) has a long history of use in both Ayurvedic and Chinese medicine.* Tribulus is most often used to enhance libido and sexual performance.* It has been shown to increase levels of dehydroepiandrosterone sulfate (DHEA-S), a testosterone precursor. Tribulus helps support a normal healthy erection quality and orgasmic function in men.* Studies suggest that the pro-erectile effects of tribulus may be due to enhanced nitric oxide production.*

Withania somnifera (ashwagandha), an herb commonly used in Ayurvedic medicine, is known as an adaptogen, aphrodisiac, and rejuvenator.* *Withania somnifera* can help the body adapt to various stressors that diminish sexual performance and pleasure.* Scientific studies have shown that ashwagandha interacts with the hypothalamic-pituitary-adrenal (HPA) axis, thereby reducing the rise in cortisol seen with chronic stress.* Ashwagandha is used to promote a balanced mood, memory, and restorative sleep, and to improve physical and mental stamina.* Improved markers of fertility have also been seen in men with ongoing use of ashwagandha.*

Fouquieria splendens (ocotillo bark) is another extremely useful botanical for men.* *Fouquieria splendens* is held in high esteem by Southwestern herbalists, Latin American *curanderos* (folk healers), and native people in the Southwest.* Traditional lore suggests that ocotillo can improve venous blood flow in the lower abdomen, thus relieving pelvic congestion.* Normal, healthy pelvic blood flow is associated with a satisfactory sex drive and sexual experience in men as well as women.*

Cinnamomum zeylanicum (Ceylon cinnamon, also known as *Cinnamomum verum* or 'true' cinnamon) is well known in traditional medicine.* It is a potent antioxidant that can support the health of various tissues throughout the body.* Among its properties, cinnamon may help shield the male reproductive system from the harmful effects of environmental stressors and toxins.* In animal studies, cinnamon has been shown to boost semen quality, an indicator of male fertility.* The natural ingredients in cinnamon have been shown to enhance the erectile response in penile tissue by a mechanism that is independent of nitric oxide.*

Corynanthe yohimbe (also known as *Pausinystalia yohimbe*, or simply yohimbe) has long been used in traditional medicine of Western Africa to enhance male sexual function.* The plant contains the alkaloid yohimbine, which acts as an alpha-2 adrenergic antagonist in the central and peripheral nervous system.* Research shows that yohimbe supports nitric oxide release and enhances penile blood flow associated with normal, healthy erections.*

Supplement Facts

Serving Size 1 Dropperful (1 mL)
 Servings Per Container Approx. 60

| Amount Per Serving | % Daily Value |
|---|---------------|
| Proprietary blend | 164 mg † |
| <i>Epimedium sagittum</i> (Horny Goat Weed) aerial, <i>Tribulus terrestris</i> (Puncture Vine) fruit, <i>Withania somnifera</i> (Ashwagandha) root, <i>Fouquieria splendens</i> (Ocotillo) bark, <i>Cinnamomum zeylanicum</i> (Cinnamon) bark, <i>Corynanthe yohimbe</i> (Yohimbe) bark. | |

† Daily Value not established.

Other ingredients: Organic vegetable glycerin, organic cane ethanol, distilled water.

Suggested Use: As a dietary supplement, 1 dropperful one to three times daily with or without meals, or as directed by a healthcare practitioner. Shake well before use.

WARNING: Seek expert medical advice before taking during pregnancy. If you are taking any prescription drug, or if nervousness, tremors, irritability, or dizziness occur, discontinue use and consult your healthcare professional.
